SKILLS

- **Languages:** Python, C, C++, SQL
- **Technologies:** Machine Learning, NLP, Regression, Classification, Feature Engineering
- **Databases/Tools:** MySQL, Pandas, NumPy, Matplotlib, Scikit-learn, Jupyter, Git, GitHub
- **Soft Skills:** Problem Solving, Communication, Time Management, Adaptability, Leadership

PROJECTS

Customer Churn Prediction System | Jul 2026 - Aug 2026

- Analyzed 7,043 customer records and 33 variables to identify patterns linked with service churn.
- Performed EDA, missing-value treatment, categorical encoding and feature preparation for model training.
- Developed and compared classification models using standard metrics including precision, recall and F1-score.
- Designed a customer-retention workflow to identify high-risk customers and support targeted business decisions.
- **Tech Stack:** Python, Pandas, NumPy, Matplotlib, Scikit-learn

Cybersecurity Awareness Project | WNS Cares Foundation Jul 2026 – Aug 2026

- Covered 5 cybersecurity modules addressing social media safety, cyberbullying, public internet, financial security and cyber grooming.
- Conducted 1 structured awareness session with interactive activities, quizzes and practical guidance on safe digital practices.
- Supported online learning through 5 course modules, progress tracking, assessments and digital certification activities.
- Documented 30 certificate reference records as project evidence and evaluated learning through feedback and participation.
- **Tech Stack:** WNS Cares Foundation, Online Learning Platform, Microsoft PowerPoint

Student Performance Prediction System | Sep 2025 – Oct 2025

- Analyzed 649 student records containing academic, demographic, social and school-related attributes.
- Performed EDA, preprocessing and feature preparation using Pandas, NumPy and Matplotlib libraries.
- Implemented supervised learning models to predict student performance and compared their evaluation metrics.
- Built an end-to-end pipeline covering data preparation, feature engineering, training and model evaluation.
- **Tech Stack:** Python, Pandas, NumPy, Matplotlib, Scikit-learn

TRAINING

NPTEL - SWAYAM | Certificate Jul 2026 - Oct 2026

Artificial Intelligence: Concepts and Techniques — IISc Bangalore

Artificial Intelligence Trainee

- Covered a 12-week AI curriculum covering agents, problem solving, search strategies, logic and reasoning, knowledge representation and planning.
- Developed understanding of learning algorithms, neural networks, deep learning, evolutionary algorithms, fuzzy systems and Natural Language Processing.
- Studied practical AI applications including expert systems, generative AI, web/mobile agents and multi-agent systems, along with AI ethics.
- Strengthened skills in AI problem solving, logical reasoning, model-oriented thinking, intelligent-system design and applying AI techniques to real-world problems.

CERTIFICATES

- Introduction to Artificial Intelligence | [Infosys Springboard](#) Mar 2026
- Introduction to Python | [Saylor Academy](#) Feb 2026
- Leadership Fundamentals | [EduTech Hub](#) Oct 2025

ACHIEVEMENTS

- Maintained a consistent **coding practice record**, strengthening DSA, algorithms and competitive problem-solving skills through regular practice.
- Practiced **4 programming languages** — Python, C, C++ and SQL — through coding exercises, debugging and algorithmic problem-solving.
- Participated in **hackathons, coding contests and technical competitions**, gaining experience in teamwork, innovation and time-bound solution development.
- Engaged in **technical activities and technology-focused events**, expanding practical exposure to AI, ML, NLP and emerging technologies.

EDUCATION

- **Lovely Professional University** Phagwara, Punjab
Bachelor of Technology - Computer Science and Engineering; **CGPA: 8.62** Aug 2025 - Present
- **City Montessori School** Lucknow, Uttar Pradesh
Higher Secondary Education; **Percentage: 97.2%** Jul 2024 - May 2025
- **City Montessori School** Lucknow, Uttar Pradesh
Secondary Education; **Percentage: 98.0%** Mar 2022 - May 2023
